

Simply Beautiful®

Long-lasting color. Simple to choose. Simple to use.

24 in. (60 cm)

#46

Warm Season

This combination container has quite a tropical flare and would look right at home on any deck or patio during the hot Summer months. Although it features two types of Impatiens, this combination will still thrive with a small amount of sunlight, so don't worry if it gets some dappled sun from time to time. Be sure to keep the soil moist and feed with an all-purpose fertilizer every 10 to 14 days.
